$i = 1 \to 2$: turn ω_0
$i = 4 \to 5$: turn ω_0
$j = 0$, $\omega_0 = 1$
coordinates 0–1, fast
$j = 1$, $\omega_1 = 0.1$
coordinates 2–3
$j = 2$, $\omega_2 = 0.01$
coordinates 4–5
$j = 3$, $\omega_3 = 0.001$
coordinates 6–7, slow
$i = 0$
$i = 1$
$i = 2$
$i = 3$
$i = 4$
$i = 5$
$i = 44$
$i \to i + \delta$ turns row j by $\delta\,\omega_j$, whatever i is
at $i = 44$ the fast hand nearly repeats $i = 0$; slower rows tell the two apart
