Which object does the method change?
CONTEXT
prompt · examples · retrieved text
fixed weights
longer sequence
TRAINABLE STATE
soft prompt · adapter · LoRA
restricted writes
backprop through base
REPRESENTATION
integer codes · scales · metadata
approximate values
kernel-dependent speed
QLoRA composes these two
SEPARATE COST LEDGER — NOT COLUMN-MATCHED
BACKBONE STORAGE
shared or copied per task
INCREMENTAL STATE
prompt or learned delta
TRANSIENT WORK
tokens · activations · caches
