

USEFUL FIXED CHOICE

MAKE ONE PART LEARNABLE

AUDIT THE NEW BOUNDARY

1

hand-designed features

hidden representations

wrong structure

2

hand-designed filters

local detectors

depth and transfer

3

one-shot code

streaming state update

finite memory

4

fixed similarity

Q/K/V routing

position and cost

5

fixed reuse or sampler

adaptation and generation

evaluation and values

preserve what is useful · expose what is rigid · test what the change earned
